ABOUT THE INSTITUTION

GVP College of Engineering (GVPCOE) was established in 1996 for the promotion of quality technical education in Andhra Pradesh. The college is very actively involved in a number of research and consultancy projects. Because of its consistently good performance since its inception, the College has been granted AUTONOMOUS STATUS w.e.f. 2009-10 and has been accredited by the NAAC in April, 2009 with 'A' Grade with a CGPA OF 3.47/4.00. All the undergraduate courses are accredited by the NBA with 4 out of 7 programmes getting accreditation for 5 years. The College has been selected in 2003 by the Government of AP and the Government of Germany(GTZ) as their partner to establish and administer an Institute called Indo-German Institute of Advanced Technology in Visakhapatnam.

ABOUT THE DEPARTMENT

In 1999, after a gap of about 15 years, GVPCOE was the first private engineering college to have started Civil Engineering Department, in the Andhra Pradesh State with an intake of 30 students. The current intake is 120. The department also started an M.Tech programs in Infrastructural Engineering & Management, in 2008, and Structural Engineering in 2011 with an intake of 18 each. The department has well-qualified faculty and non-teaching staff and well-equipped laboratories to impart training to the students. The faculty are also working on internally & externally funded R&D projects and have published their research in various journals and conferences. All the faculty are actively involved in consultancy projects to the tune of Rs 2.0 Crores. The department has been identified as a State Resource Institution (SRI) by Ministry of Home Affairs(New Delhi) under NPCBEERM. The department has got 5-year accreditation by NBA in the very first attempt, based on the recommendation of an inspection committee.

ABOUT THE CONFERENCE

The construction demand our country is increasing and at the same time there is an acute shortage of skilled labor. In this context Precast construction is a favorable answer. While this is a proven technology adopted in western countries since several decades, its application in our country has just taken. Already we are experiencing the benefit of world renowned precast manufacturers who have started implementation of precast technologies in India for various projects.

Although Precast construction is quite prevalent in Bridge construction, still it has to go a long way in Building sector. Mumbai and Delhi are already constructing high rise buildings 30 storied and above with using complete precast technology. With this we believe many realtors and developers will shift their attention to precast construction which is fast in construction, less labor intensive, durable and with excellent finish.

This seminar focuses on issues on designing, detailing, transportation and erection of precast elements.

ABOUT VISAKHAPATNAM

Visakhapatnam (popularly known as Vizag to the locals), is a place where mountains meet the sea and is a fast developing port city, on the East Coast of India situated almost midway between Chennai and Kolkata. Vizag is both an industrial hub and a favourite with tourists. It has a population of 1.5million (2001 censuses) and is spread over an area of 530 square kilometers, Visakhapatnam is Andhra Pradesh's second largest urban agglomeration in population. Visakhapatnam appears like a basin, as it is bounded by Kailasigiri Hills, Yarada Hills and Narava hill ranges on North, South and West respectively and on East by Bay of Bengal.

Vizag is also home to heavy industries like Visakhapatnam Steel Plant, Hindustan Shipyard, Bharat Heavy Plates & Vessels Ltd. And Coromandel Fertilisers Ltd. The headquarters of the Eastern Naval Command of the Indian Navy is situated at Vizag. It is also a well-known seat of learning with a large number of institutions of higher education and research like the Andhra University, a large number of engineering colleges, Naval Science and Technology Laboratory, National Ship Research & Design Centre. Araku Valley and Borra Caves are places frequented by tourists. Visakhapatnam enjoys a strategic geographical location and is well connected by Air, Rail and Road to all major cities in India.

CONCRETE BUILD EXPO - 2013

Simultaneous with the International Conference, ICICPC-2013 is planning the Concrete Build Expo 2013. Indoor and outdoor exhibitor stalls of various dimensions are available for the industry. Exhibitors can show case their products and technology in the following areas during the conference.
