SCHEME OF COURSE WORK

Course Details:

Course Title	Mathematics II							
Course Code	15BM1102 L T P C 3 0 0 3							
Program:	B.Tech.							
Specialization:	Electronics and Communication Engineering							
Semester	II Semester							
Prerequisites	Basic formulae of differentiation and integrations.							
	• Basic terminology and elementary operations on Matrices and properties.							
	Basic concept of Partial Differentiation.							
Courses to which it is a prerequisite : For all Engineering Courses								

PROGRAM OUTCOMES:

A graduate of Electronics and Communication Engineering will be

- 1. A graduate of Electronics and Communication Engineering will be able to apply the knowledge of mathematics, science, engineering fundamentals to solve complex Electronics and Communication Engineering problems.
- 2. A graduate of Electronics and Communication Engineering will be attain the capability to identify, formulate and analyse problems related to Electronics and Communication Engineering.
- 3. A graduate of v will be in a position to design solutions for mechanical system components and processes that meet the specified needs with appropriate consideration for public health and safety.
- 4. A graduate of Electronics and Communication Engineering will be able to conduct experiments, perform analysis and interpretation of data by using research methods such as design of experiments to synthesize the information and to provide valid conclusions.
- 5. A graduate of Electronics and Communication Engineering will be able to select and apply appropriate techniques from the available resources and current Mechanical Engineering and software tools.
- 6. A graduate of Electronics and Communication Engineering will be able to carry out their professional practice in Mechanical Engineering by appropriately considering and weighing the issues related to society.
- 7. A graduate of Electronics and Communication Engineering will be able to understand the impact of the professional engineering solutions on environmental safety and legal issues.
- 8. A graduate of Electronics and Communication Engineering will be transform into responsible citizens by resorting to professional ethics and norms of the engineering practice.
- 9. A graduate of Electronics and Communication Engineering will be able to function effectively in individual capacity as well as a member in diverse teams and in multidisciplinary streams.
- 10. A graduate of Electronics and Communication Engineering will be able to communicate fluently with the engineering community and society, and will be able to prepare reports and make presentations effectively.
- 11. A graduate of Electronics and Communication Engineering will be able to apply knowledge of the engineering and management principles to managing projects and finance in multidisciplinary environments.
- 12. A graduate of Electronics and Communication Engineering will be engage themselves in independent and life-long learning to continuing professional practice in their specialized areas of Information Technology.

Course Outcomes (COs):

-	
1	Solve the linear system of equations analytically and compute Eigen values and eigenvectors of
	a square matrix.
2	Numerically solve linear system of equations and compute eigen values and eigenvectors of a
	square matrix.
3	Discuss and demonstrate difference equations to discrete systems.
4	Calculate Fourier series and Fourier transforms for certain functions.
5	Classify and solve partial differential equations and apply it to heat flow and wave propagation problems.

Course Outcome versus Program Outcomes:

COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO-1	S	S										
CO-2	S	М										
CO-3	S	S										
CO-4	S	S										
CO-5	S	S										

S - Strongly correlated, M - Moderately correlated, Blank - No correlation

Assessment Methods:	Assignment / Quiz / Seminar / Case Study / Mid-Test / End Exam

Teaching-Learning and Evaluation

Week	TOPIC / CONTENTS	Cour se Outc omes	Sample questions	TEACHING- LEARNING STRATEGY	Assessment Method & Schedule
1	Solve the linear system of equations analytically and compute Eigen values and eigenvectors of a square matrix.	CO-1	1) If $A = \begin{bmatrix} 1 & 1 & 3 \\ 1 & 3 & -3 \\ -2 & -4 & -4 \end{bmatrix}$, find A^{-1} by Cayley Hamilton Theorem. 2) Find the value of $\}$ for which the system of equations 3x - y + 4z = 3, x + 2y - 3z = -2, 6x will have infinite number of solutions and solve them with that $\}$ value. 3) Verify Cayley Hamilton Theorem for the Matrix $A = \begin{bmatrix} 2 & 1 & 1 \\ 0 & 1 & 0 \\ 1 & 1 & 2 \end{bmatrix}$.	Lecture / Problem solving	Assignment (Week 2 - 4) / Quiz-I (Week -8)/ Mid- Test 1 (Week 9)
2	Numerically solve linear system of equations and compute eigen values and eigenvectors of a square matrix.	CO-2	1) Using factorization method to solve the equations $3x + 2y + 7z = 4, 2x + 3y + z = 5, 3x + 4y + z = 7$ the 2) Gauss-Seidel method to solve the	Lecture / Problem solving	Assignment (Week 2 - 4)/ Quiz -I (Week -8)/ Mid- Test 1 (Week 9)

			equations $2x + y + 6z = 9, 8x + 3y + 2z = 13, x + 5y + z = 7$ 3) Using Rayleigh's power method, find the largest eigen value and corresponding eigen vector of $A = \begin{bmatrix} 2 & -1 & 0 \\ -1 & 2 & -1 \\ 0 & -1 & 2 \end{bmatrix}$		
3	Difference operators (forward, backward and shift operators)	CO-3	1) Find $\Delta^2 \left(\frac{5x+1}{x^2+5x+6} \right)$	Lecture / Problem solving	Mid-Test 1 (Week 9)/ Assignment (Week 2 - 4)/ Quiz -I (Week -8)
5	Linear difference equations	CO-3	1) Solve the difference equation	Lecture / Problem	Mid-Test 2
	and it's complete solution. Rules for finding the complementary function and complete integral, Deflection of a loaded string.		y_{x+2} - $2y_{x+1}+y_x=2^x$	solving	(Week 18) / Quiz -II (Week -17)/ Assignment (12- 14)
6	Calculate Fourier series and	CO-4	1) Find the Fourier Series for	Lecture / Problem	Mid-Test 2
	Fourier transforms for		$f(x) = e^{-x}$ in $0 < x < 2f$.	solving	(Week 18)/ Quiz -II
	certain functions.		2) Find the Fourier Series for $f(x) = x^2$		(Week -17)/ Assignment (12- 14)
			in $0 < x < 2f$.		
			3) Find the Fourier Transform of		
			$f(x) = \begin{cases} 1, & if \ x < 1\\ 0, & if \ x > 1 \end{cases}$		
7	Classify and solve PDE and	CO-5	1) Find the partial DE for $z =$	Lecture / Problem	Mid-Test 2 (Week 18) /
	apply it to heat flow and		$f(x + c_i) + g(x - c_i)$ by eliminating f	sorving	Quiz -II
	wave propagation problems.		and g .		(Week -17)/ Assignment (12-
			2) Solve $\nabla^2 V = 0$ subject to		14)
8	Mid-Test 2				
9	END EXAM				
		1		1	1
