

SOFTWARE REQUIREMENTS AND ESTIMATION

Course Code: 15IT2101

L	P	C
3	0	3

Pre requisites: Software Engineering.

Course Outcomes:

At the end of the course, a student will be able to

CO1: Discuss requirements elicitation techniques.

CO2: Identify the software requirements for a given project.

CO3: Explain software estimation.

CO4: Estimate the software in terms of effort, schedule and cost.

CO5: Describe the tools for requirements management and estimation.

UNIT-I

(10-Lectures)

Software Requirements: What and Why: Essential Software requirement, Good practices for requirements engineering, Improving requirements processes, Software requirements and risk management.

Software Requirements Engineering: Requirements elicitation, requirements analysis documentation, review, elicitation techniques, analysis models, Software quality attributes, risk reduction through prototyping, setting requirements priorities, verifying requirements quality.

UNIT-II

(10-Lectures)

Software Requirements Management: Requirements management Principles and practices, Requirements attributes, Change Management Process, Requirements Traceability Matrix, Links in requirements chain.

Software Requirements Modeling: Use Case Modeling, Analysis Models, Dataflow diagram, state transition diagram, class diagrams, Object analysis, Problem Frames.

UNIT- III (10-Lectures)

Software Estimation: Components of Software Estimations, Estimation methods, Problems associated with estimation, Key project factors that influence estimation.

Size Estimation: Two views of sizing, Function Point Analysis, Mark II FPA, Full Function Points, LOC Estimation, Conversion between size measures.

UNIT-IV (10-Lectures)

Effort, Schedule and Cost Estimation: What is Productivity? Estimation Factors, Approaches to Effort and Schedule Estimation, COCOMO II, Putnam Estimation Model, Algorithmic models, Cost Estimation.

UNIT-V (10-Lectures)**Tools for Requirements Management and Estimation**

Requirements Management Tools: Benefits of using a requirements management tool, commercial requirements management tool, Rational Requisite pro, Caliber – RM, implementing requirements management automation.

Software Estimation Tools: Desirable features in software estimation tools, IFPUG, USC's COCOMO II, SLIM (Software Life Cycle Management) Tools.
